Exploring new frontiers
in digital transformation

Collaborating with us

BBD has been at the **forefront of providing software development** and application design solutions for over 35 years. We've helped the likes of banks, government institutions, insurance companies and telecommunication firms get their mission-critical systems online - we can do the same for you.

We are committed to **simplifying** our clients' lives, and **enabling** their business through technology.

By using our extensive knowledge of legacy systems, our core acceleration framework - Vanguard, our quick start tool boxes alongside a deep enthusiasm for the latest and greatest technology, we've cultivated an approach to integrated software implementations that we like to call 'Combined Intelligence'.

Services & expertise

Helping your business thrive in today's digital worldin today's digital world

As your international software partner, we discover and develop the technology solutions your business needs – and work closely with you every step of the way.

Digital strategy

Starting with an analysis of your technological and business landscape, we optimise your business processes to create, adapt and integrate new and existing solutions which enable a cohesive and effective digital strategy

Tech & business consulting

We perform digital health assessments to advise on the correct technology and technical architecture to realise your business strategy. We do this using the latest best practices including DevOps and Agile

Cloud enablement

We understand cloud technologies and develop multi-cloud strategies and implementations which enable you to rehost, migrate or rearchitect your environment for ultimate business flexibility and adaptability using AWS, Azure or Google Cloud Platform services

Software development

We design and implement custom business systems that implement your differentiated business strategy. We don't sell software, we build business solutions

Systems integration

We're able to implement digital innovation and reliability in your technical architecture through the integration of off-the-shelf, legacy and custom software solutions that meet your business needs

Maintenance & support

To reduce downtime that affects your business operations and better ensure a stable digital environment, our maintenance and support services keep your systems streamlined and stress-free

Through bleeding edge technologies including robotic process automation (RPA), enterprise content capture (ECC) and business process management (BPM), Xpertek Contact enables their clients to leverage digital solutions to enhance internal operations. RPA and ECC allow for the sourcing and digitisation of data from almost any data source while BPM controls the flow and presentation of this data to users before it is used to deliver the desired outcome.
