| Collaborating with us

BBD has been at the forefront of providing innovative, automated and cloud-centric solutions for nearly four decades. We've helped the likes of banks, public institutions, insurance companies and telecommunication firms get their mission-critical systems online, and we can do the same for you.

We are committed to bringing our clients' ideas to life by rapidly deploying transformative and reliable software solutions – freeing our clients up to focus on differentiating themselves in the market.

Using our extensive knowledge of legacy systems, accelerators such as Seeka, Vanguard and Predictr alongside our domain expertise and deep enthusiasm for the latest and greatest technology, our clients benefit from technical solutions that they can use for additional advantage, business value creation and growth. We partner with our clients to form a relationship of trust throughout the development lifecycle and as such, our service offering starts with providing initial planning and architecture advice, through to complete managed project delivery and support.

Services & expertise

As your software partner, we deliver solutions that make your organisation run seamlessly

Combining deep cross sector experience with the latest innovations, we create sought-after tech solutions and guidance while offering thorough support that is tailored to what your organisation needs to meet strategic business goals.

Digital strategy

Starting with an analysis of your technological and business landscape, we create and integrate new and existing solutions that will optimise your business processes.

Tech & business consulting

Our experts help you realise your business strategy through technology. We offer digital health assessments and advise on the best approach and tech to keep you at the forefront of innovation.

Cloud enablement

As an AWS Advanced Partner with Well-Architected, Public Sector and CloudFront Global Content Delivery Network capabilities, on top of our Microsoft Azure expertise, we can develop a reliable, secure and scalable solution for your environment.

Software development

We design and implement software that will optimise and automate your differentiated business strategy. We don't sell products, we create tech solutions that solve individual business problems.

System integration

As tech constantly evolves, so too must your solutions. We are specialists at integrating new and existing platforms into your environment to increase efficiency and reduce costs.

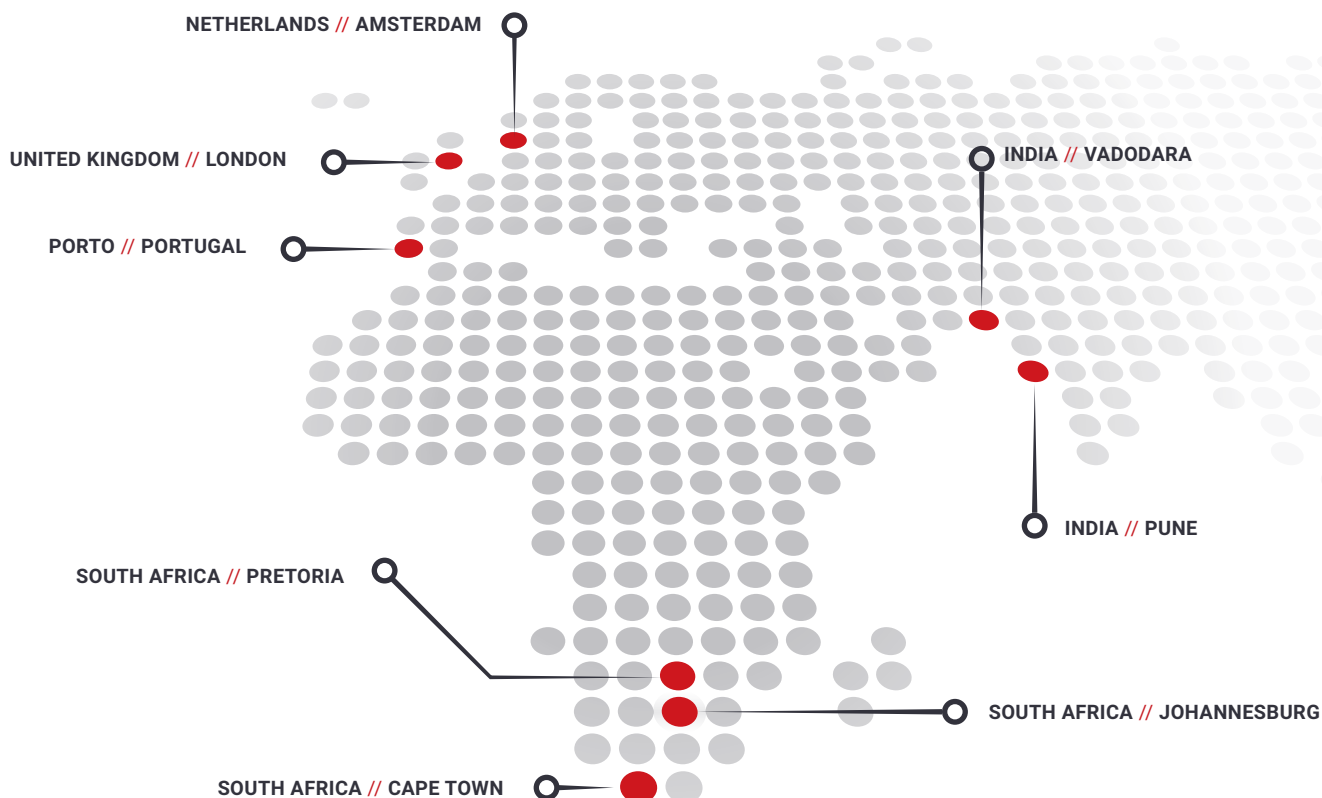

Maintenance & support

We employ best practice techniques to keep your system streamlined and stress free. We maximise your programmes, increase system productivity, reduce downtime and ensure a stable digital environment.

Partners and associates

International footprint

| Our group of companies

BBD builds effective digital business solutions which support the optimisation of your business processes. Using our in-depth knowledge of software development and system integration, we design and implement cohesive bespoke digital strategies that speak to each client's technical architecture using the latest technologies and best practices.

Through bleeding edge technologies including robotic process automation (RPA), enterprise content capture (ECC) and business process management (BPM), Xpertek Contact enables their clients to leverage digital solutions to enhance internal operations. RPA and ECC allow for the sourcing and digitisation of data from almost any data source while BPM controls the flow and presentation of this data to users before it is used to deliver the desired outcome.
