Collaborating with us

BBD has been at the forefront of providing innovative, automated and cloud-centric solutions for nearly four decades. We've helped the likes of banks, public institutions, insurance companies and telecommunication firms get their mission-critical systems online, and we can do the same for you.

We are committed to bringing our clients' ideas to life by rapidly deploying transformative and reliable software solutions – freeing our clients up to focus on differentiating themselves in the market.

Using our extensive knowledge of legacy systems, accelerators such as Seeka, Vanguard and Predictr alongside our domain expertise and deep enthusiasm for the latest and greatest technology, our clients benefit from technical solutions that they can use for additional advantage, business value creation and growth. We partner with our clients to form a relationship of trust at every stage in our engagement with you, and as such, our service offering starts with providing initial planning and architecture advice, through to complete managed project delivery and support.

Services & expertise

We help your organisation leverage off of smart technological solutions

At every step in the journey, we work with you and your teams to create sought-after tech solutions, guiding you through the implementation of tailored solutions that meet your strategical goals.

Digital strategy

Starting with an analysis of your technological and business landscape, we create and integrate new and existing solutions that will optimise your business processes.

Tech & business consulting

Our experts help you realise your business strategy through technology. We offer digital health assessments and advise on the best approach and tech to keep you at the forefront of innovation.

Cloud enablement

As an AWS Advanced Partner with Well-Architected, Public Sector and CloudFront Global Content Delivery Network capabilities, on top of our Microsoft Azure expertise, we can develop a reliable, secure and scalable solution for your environment.

Software development

We design and implement software that will optimise and automate your differentiated business strategy. We don't sell products, we create tech solutions that solve individual business problems.

System integration

As tech constantly evolves, so too must your solutions. We are specialists at integrating new and existing platforms into your environment to increase efficiency and reduce costs.

Maintenance & support

We employ best practice techniques to keep your system streamlined and stress free. We maximise your uptime, increase system productivity and ensure a stable digital environment.

International footprint

We are growing our presence in all regions, with a keen focus on Europe.

As a responsible global citizen, we are committed to celebrating our diversity and are proud to have created a space where all of our internationally distributed teams members can grow and thrive.

To do our part in developing an inclusive environment that extends into the technology sector at large, we are committed to fair and equal hiring practices, and supporting grassroots initiatives and other community programmes which are geared at widening the skills pool - finding and nurturing talented individuals who may not otherwise have had the opportunity.

Through bleeding edge technologies including robotic process automation (RPA), enterprise content capture (ECC) and business process management (BPM), Xpertek Contact enables their clients to leverage digital solutions to enhance internal operations. RPA and ECC allow for the sourcing and digitisation of data from almost any data source while BPM controls the flow and presentation of this data to users before it is used to deliver the desired outcome.
