# Collaborating with us

BBD has been at the forefront of providing innovative, automated and cloud-centric solutions for nearly four decades. We've helped the likes of banks, public institutions, insurance companies and telecommunication firms get their mission-critical systems online, and we can do the same for you.

We are committed to bringing our clients' ideas to life by rapidly deploying transformative and reliable software solutions – freeing our clients up to focus on differentiating themselves in the market.

Using our extensive knowledge of legacy systems, accelerators such as Seeka, Vanguard and Predictr alongside our domain expertise and deep enthusiasm for the latest and greatest technology, our clients benefit from technical solutions that they can use for additional advantage, business value creation and growth. We partner with our clients to form a relationship of trust at every stage in our engagement with you, and as such, our service offering starts with providing initial planning and architecture advice, through to complete managed project delivery and support.

For more information, please visit [www.bbdsoftware.com](http://www.bbdsoftware.com)

# Partners and associates

## International footprint

We are growing our presence in all regions, with a keen focus on Europe.

As a responsible global citizen, we are committed to celebrating our diversity and are proud to have created a space where all of our internationally distributed teams members can grow and thrive.

To do our part in developing an inclusive environment that extends into the technology sector at large, we are committed to fair and equal hiring practices, and supporting grassroots initiatives and other community programmes which are geared at widening the skills pool - finding and nurturing talented individuals who may not otherwise have had the opportunity.

Through bleeding edge technologies including robotic process automation (RPA), enterprise content capture (ECC) and business process management (BPM), Xpertek Contact enables their clients to leverage digital solutions to enhance internal operations. RPA and ECC allow for the sourcing and digitisation of data from almost any data source while BPM controls the flow and presentation of this data to users before it is used to deliver the desired outcome.
