Competencies

Validated through an external audit process, AWS Competencies are intended to recognise deep AWS technical expertise and capability, and proven customer success in specialised areas and workloads.

Service Delivery programs

- AWS Systems Manager
- Cloudfront
- WAF
- QuickSight
- RDS
- Windows on EC2

Programs

Infrastructure as Code (IaC) Library

We have created 30 IaC scripts that are made available to customers to accelerate their cloud adoption journey, such as setting up multi account VPCs and doing security remediation that aligns an AWS account to the AWS Security Foundations, among other functions.

Clients in the cloud

What our clients had to say

element₂₂

“Highest levels of professionalism from the whole team. Engaged, flexible, full of innovative ideas and everything delivered on time and to budget. They have deep AWS subject matter expertise but are also able to educate the non-technologists. Highly recommend the BBD team.”

Right
ePharmacy

“The BBD team are attending to our need in a professional and diligent manner. The BBD team fulfil our needs by employing a diverse mix of appropriately qualified staff with ample experience.”

Sabⁱnet

“BBD has set us up for success in the AWS space with best practices and a well-architected solution that will grow with our company's adoption of more AWS services. They have given us a very flexible pricing model which assisted us to reach our short-term goals with a lower barrier to entry into AWS.”

Sanlam

“They have a huge base of excellent skills for cloud and cloud development. Their knowledge has helped us speed up cloud adoption within our business.”

Standard Bank

“BBD have been a long-term partner with the bank, and during that time they have provided both excellent resources as well as excellent products. They are always professional and are incredibly proficient. They come up with creative and efficient solutions and overall are an asset to our team.”
